1 Installation

- ▷ Copy the file <sgrid_ugrid.dll> to the C++ plugin directory of QGIS. In my development installation it is:
<c:\OSGeo4W64\apps\qgis\plugins\sgrid_ugrid.dll>.
- ▷ Install the user manual on the program files directory
<c:\Program Files\Mooiman\sgrid_ugrid\doc>
 - sgrid_ugrid_um.pdf
- ▷ Install the icons on the program files directory
<c:\Program Files\Mooiman\sgrid_ugrid\icons>
 - file_open.png
 - map_output.png
 - plotcfts.png
 - remote_olv.png
 - ...
- ▷ Install the program PlotCFTS on the program files directory
<c:\Program Files\Mooiman\plotcfts>

Some notes

- ▷ The sgrid_ugrid.dll need the following dll's, so they should be in the %PATH%-environment variable:
 - qt6core.dll
 - qt6gui.dll
 - qt6widgets.dll
- ▷ Next dll's are probably already placed in the %PATH%-environment variable when installing QGIS:
 - qgis_core.dll
 - qgis_gui.dll
